

# Rethinking Growth.

**Donnerstag, 18. März 2010, 17.00 Uhr**  
ZHAW, Campus Technikumstrasse 71, Eulachpassage, Winterthur,  
Raum TN E0.54

**Referent:**  
**Prof. Dr. Roberto Peccei**  
(University of California,  
Los Angeles)

“I begin with a brief discussion of Limits to Growth and the criticisms that surrounded this first report to the Club of Rome. This is followed by an examination of model attempts to show that economic growth and a healthy environment can co-exist. This discussion of the, so-called, Environmental Kuznets Curve raises the issue of properly costing externalities and of Eco-economics. I end by raising the need for a new paradigm to help restructure the world’s financial system and with a call to action to economists to re-think growth.”
